

# Detailed VR and Software Solutions - Product Catalog

Product: ImmersiBuild VR

Industry: Architecture & Construction

Description: An advanced VR platform for architects to visualize and modify structures in real-time.

Specifications: Supports 8K rendering, real-time collaboration, AI-powered design assistance.

Case Study: Implemented by XYZ Constructions, reducing design errors by 30%.

Compliance: ISO 9001 certified for architectural software.

Product: VR Architect Pro

Industry: Architecture & Construction

Description: A high-end VR software for immersive architectural visualization.

Specifications: Supports BIM integration, cloud-based storage, and multi-user design collaboration.

Case Study: Used in SmartCity development, reducing project planning time by 25%.

Compliance: LEED-certified visualization tools.

Product: MediSim XR

Industry: Healthcare

Description: A next-generation extended reality (XR) medical training simulator for surgery and diagnostics.

Specifications: Includes haptic feedback, AI-guided procedures, multi-scenario training.

Case Study: Adopted by XYZ Medical University, increasing trainee success rate by 40%.

Compliance: FDA-approved medical simulation software.

Product: MediVR Sim

Industry: Healthcare

Description: A VR-based medical training simulator for healthcare professionals.

Specifications: Realistic anatomy models, AI-assisted training, integration with hospital EMR systems.

Case Study: Used in XYZ Medical Hospital, reducing medical training errors by 35%.

Compliance: HIPAA-compliant data handling.

Product: EduVerse 360

Industry: Education

Description: A fully immersive 3D educational platform offering virtual classes and interactive learning.

Specifications: Multi-language support, AI-personalized learning paths, interactive simulations.

Case Study: Used in XYZ Academy, increasing student engagement by 50%.

Compliance: Meets WCAG accessibility standards.

Product: EduVR Class

Industry: Education

Description: A VR-based virtual classroom solution for interactive online education.

Specifications: VR headset compatibility, teacher-controlled environments, AI tutoring.

Case Study: Implemented by XYZ University, improving remote education effectiveness by 30%.

Compliance: FERPA-compliant for student privacy.

Product: CyberSentinel AI

Industry: Cybersecurity

Description: An AI-driven cybersecurity suite for real-time threat detection and risk management.

Specifications: Machine learning intrusion detection, real-time security patching, anomaly detection.

Case Study: Deployed in XYZ Bank, reducing cyber threats by 40%.

Compliance: NIST cybersecurity framework compliant.

Product: CyberGuard AI

Industry: Cybersecurity

Description: Advanced AI-driven threat detection and cybersecurity monitoring system.

Specifications: 24/7 network monitoring, AI-driven firewall optimization, incident response automation.

Case Study: Used in XYZ Corporation, improving threat response time by 50%.

Compliance: GDPR-compliant data security.

Product: FoodSmart AI

Industry: Food & Delivery

Description: AI-powered restaurant automation and delivery optimization software.

Specifications: AI-powered order prediction, fleet management, seamless POS integration.

Case Study: Adopted by XYZ Restaurant Chain, reducing delivery delays by 30%.

Compliance: PCI-DSS compliant payment integration.

Product: DigiDine Manager

Industry: Food & Delivery

Description: Automated restaurant operations and AI-powered customer engagement analytics.

Specifications: Smart menu optimization, dynamic pricing, customer behavior analytics.

Case Study: Implemented in XYZ Diner, increasing customer retention by 25%.

Compliance: ISO 27001 for data security.
